Roblox might have the veneer of a video game, but it's perhaps more accurate to describe it as a set of tools its users can wield to build their own video games (or "experiences" as the company sometimes refer to them), to be hosted on the Roblox platform. These creation tools are designed to be less daunting to the entry-level developer than professional game engines, and fully customisable frameworks exist across numerous genres. These include maze-runners, first-person shooters, tycoon simulators, and free-form "roleplay" genre, where developers create worlds – schools, cities, historical eras, sci-fi dystopias, etc – for users to project their own stories onto, informed by their interactions with the setting and other users.

"People can also be whoever they want to be on the platform, and this authenticity is an important part of their self-expression, be it in real life or in the Metaverse." He points to the recent Gucci Garden event, which saw a virtual bag eventually sell for around \$4,115. Its physical counterpart costs \$3,400.
